OPTEK Technology

1645 Wallace Drive
Carrollton, TX 75006 USA

Phone: 972-323-2200
Facsimile: 972-323-2396
Email: sensors@optekinc.com
Website: www.optekinc.com

Notification Date: June 15, 2012

Product Change Notification Number: 1001

Affected Part Numbers: OPB804, OPB818

Description of Change: An alternate LED die will be used in manufacturing the listed products. A transient voltage suppression diode will be bonded across the LED anode and cathode die. The internal installation will not affect external mechanical features.

Change Identification: Product date code 1233 and later.

Reason for Change: OPTEK will use an alternate LED die to maintain delivery of product and support customer demands. In addition a transient voltage suppression diode (TVS) will be applied across the LED to decrease ESD susceptibility.

Expected Effect on Quality and Performance: By adding the transient voltage suppression diode, the LED reverse voltage rating and reverse voltage leakage are no longer applicable.

Implementation of Change: August 13, 2012

Cessation of Present Form, Fit, or Function: Not applicable since this is an introduction of an alternative construction.

Assessment: Qualification data is available upon request. Samples will be provided upon request.

Product Change Notification Authorization:

A handwritten signature in blue ink, appearing to read 'Mike King'.

Mike King
Global Director of Engineering
Optoelectronics Business Unit
