**Subject: Information regarding marking on KSC tactile switches series**

Dear Customer,

Please be informed that starting November 1st 2014, the marking on KSC series will have a slight evolution. Indeed, the digit which is referring to the assembly machine identification, highlighted in the figure below, will be removed. This evolution is led by a simplification of the product identification where tracability can be managed by the information included in the reel label. This machine marking, even kept for years is now useless.

Please consider that all other marking such as version identification or "FRANCE", will remain. This removal of machine identification marking doesn't affect by any means the product and process characteristics and as a consequence is not subject to "Product Modification Notice".

We remain at your disposal for any question you may have.

Sincerely yours.

Eric GRANGE
