NXP 8-bit EOL Program 2015

April 2015

NXP 8-bit EOL - CIN201503023I

▸ Situation:
  – 8-bit products market life time now 20+ years
  – Moving to the end of life/production cycle
  – Global market demand for these products shrinking since years
  – Reducing factory capacity vs. maintaining previous market conditions is difficult

▸ Consequences
  – Upgrading factory equipment needs significant investments
  – Business is not profitable

▸ Current Strategy
  – Above situation requires a correction of 8-bit portfolio
  – NXP has started a step-by-step EOL process a few years ago and is continuing

▸ Future Strategy
  – NXP will focus on Cortex M technology, new designs and production capacity

8-bit EOL process 2015

▸ NXP will discontinue further products listed in CIN201503023I

▸ LTB dates June 30th, 2015 and Sept. 30th , 2015

▸ LTD date December 31st, 2015

▸ NXP recommend to place LTB orders by June 30th, 2015

▸ NXP offers extended shelf life time

▸ NXP offers Cortex M products as potential redesign options

Shelf Life of affected 8-bit EOL products

▸ NXP provides an enhance shelf life time of 4 years

▸ Shelf Life of 4 years is based on factory production date code

▸ NXP recommends disti/customer store parts in the original packaging with the following conditions:
  - Sealed LTS finished product pack storage ambient conditions:
  - Storage must be in a temperature/humidity/vibration controlled room preferably in N2 cabinets
  - Temperature: +15 °C to + 35 °C
  - Humidity: less than 85% RH
  - Anti-vibration shelving is required if vibration is detected in the storage room.

List Parts & 32-Bit Replacement
