Assembly and Test Site Transfer from StatsChipPac Kuala Lumpur, Malaysia (SCM) to ASE-Chung Li (ASE-CL) Taiwan for the CS42L55-CNZ(R) component

Process/Product Change Notification (Reference Advance PCN-2014-529)

Date: June 2014

Dear Customer:

This is a Final Announcement of the Assembly and Test Site Transfer from StatsChipPac Kuala Lumpur, Malaysia to ASE-Chung Li (ASE-CL) Taiwan for the CS42L55-CNZ(R) component that is currently offered by Cirrus Logic. This Final announcement is a follow on to the Advance PCN notification communicated to all customers in February of this calendar year 2014. The details of this Assembly and Test Site Transfer are outlined on the following pages.

This notice does not change the end-of-life status of any product. Should product affected be on a previously issued product withdrawal/discontinuance notice, this notification does not extend the life of that product or change the lifetime buy offering/discontinuance plan.

The described change(s) within this PCN will not be realized or take effect any earlier than **60** days from the date of this notification, unless a customer agreement has been reached on an earlier implementation of the change or successful completion of the defined qualification has been realized.

Please note that the notification period has been reduced from 90 days to 60 days as the SCM site recently informed Cirrus that the closure date has been moved forward from December 31st, 2014 to September 30th, 2014. Cirrus has no control over any changes to the site closure date.

Any negotiated alternative change requirements will be provided via the customer's defined process. Customers with previously negotiated, special requirements will be handled separately. Cirrus Logic would like to take this opportunity to thank our customers for their cooperation and assistance in this respective matter. Any specific or immediate inquiries should be directed to your local Field Sales Representative.

Sincerely,

PCN Coordinator Cirrus Logic Corporate Quality Phone: +1(512) 851-4000

Reason for Change:							

Reason for Change:

Cirrus Logic's package Assembly and Test Supplier, StatsChipPac, has announced their site in Kuala Lumpur, Malaysia will close by September 30^{th} , 2014.

Cirrus Logic is qualifying and will move these products to the existing qualified subcontractor (ASE-CL) site location in Chung Li Taiwan.

Special Note:

As a full services supplier and in order to ensure continuity of supply as well as sustain quality an accelerated timeframe has been established for the full transfer of said product no later than September 30th, 2014.

Earlier production level material may be available from the qualified subcontractor (ASE-CL) site location in Chung Li Taiwan, but shipment(s) from Cirrus Logic are contingent on successful completion of the designated site transfer qualification.

Anticipated impact on Form, Fit, Function, Quality or Reliability (positive / negative):

Anticipated No Adverse Impact to the Quality & Reliability of said product; as Transfer Site is an existing Cirrus Logic qualified subcontractor (ASE-Chung Li) site location in Taiwan and considered low risk.

Cirrus Logic Part Number

Device 1: CS42L55-CNZ(R)

Changes to product identification resulting from this PCN:

The Cirrus Logic component symbolization on the external face of the device reflects the designated Country Of Origin.

Below you will find a representative example:

Our part: CS42L55-CNZ(R)

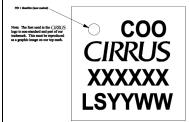

Customer part: N/A Mark format: 234 Mark change:

· Assembly vendor = None (not shown on mark) \cdot COO = changing From: **MYS** \rightarrow TO: **TWN**

Line 1: Country Of Origin (COO)

Line 2: Logo Line.

Line 3: Part Number (6 spaces max.) Line 4: Package Mark (6 spaces max.)

With the Site Transfer to ASE-Chung Li (ASE-CL) Taiwan, the material will receive the appropriate designation for the Country Of Origin.

Qualification Data:

This qualification has been specifically developed for the validation of this change. The qualification data validates that the proposed change meets the applicable released technical specifications.

- Qualification tests "pass" on zero fails for each test
- CS4207-DNZ(R) serves as the Qualification Vehicle for CS42L55-CNZ(R)

Test Equipment Correlation Plan

Note:

- The Equipment Platform Technology, Hardware and Software remain the same.
- The Visual / Mechanical inspection and Tape and Reel operations are compliant to JEDEC industry standards

The Test Equipment Correlation plan involves the following:

- Running the new site program with an OPEN Socket (No Unit) to ensure "All" tests fail.
- Serializing Control (Known Good) Units and testing the material on both test
 platforms (Existing and New Location) at all applicable test temperatures
 utilizing the same load-board and test site(s). A correlation comparison will
 be made on "All" individual components. If there is a concern or discrepancy
 exists, a bench level correlation will be performed to ensure new site meets
 data sheet requirements.
- Running samples from 2 or more lots at the existing site and at new site location. The results from each site will be compared.
- Running (the same) sample non-continuity failures (different failing tests) and testing them at the existing site and at the new site. All units are expected to fail at the new site location.
- Performing GR&R (Gauge Repeatability & Reproducibility)
